SARAYA Europe

Connect Through Life

SARAYA Europe

SARAYA' s Commitment to Sustainable Development Goals

SARAYA' s vision for business success has been through the dedication to **improving the world's sanitation, environment and health**. To achieve this, we have built a global network to help create and supply original products and services in Japan and around the world.

With the world's population ever increasing and economic developments vastly improving the standard of living in every country around the world, there is a heavy strain on the sustainability of fisheries, agriculture, and natural resources. Each is at risk of irreversible depletion. Furthermore, ventures and commodity exchanges challenge the stability of resources and can put risk on currencies, companies or even the economies of countries. Having sustainable agricultural resources, effective recycling and renewable energy is the true key to **stablize economic development in every industry**.

The United Nations set new Sustainable Development Goals (SDGs) in 2015 as an extension of 2000's Millennium Development Goals. **SARAYA aligns its own goals with the UN's SDGs**. We believe in persuing sustainable development and true global wealth by protecting the environment as much as possible using sustainable resources and novel, waste reducing packaging. This is at the center of our company mission and dictates our company culture in every way.

Yusuke Saraya
President,
Saraya Co., Ltd.

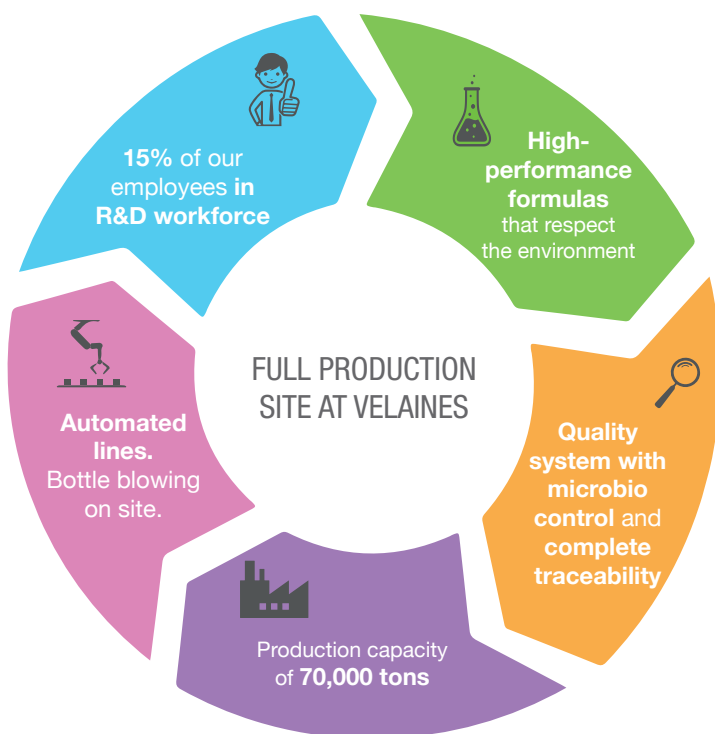

OUR MISSION :

Improve the Sanitation, Environment and Health of the world

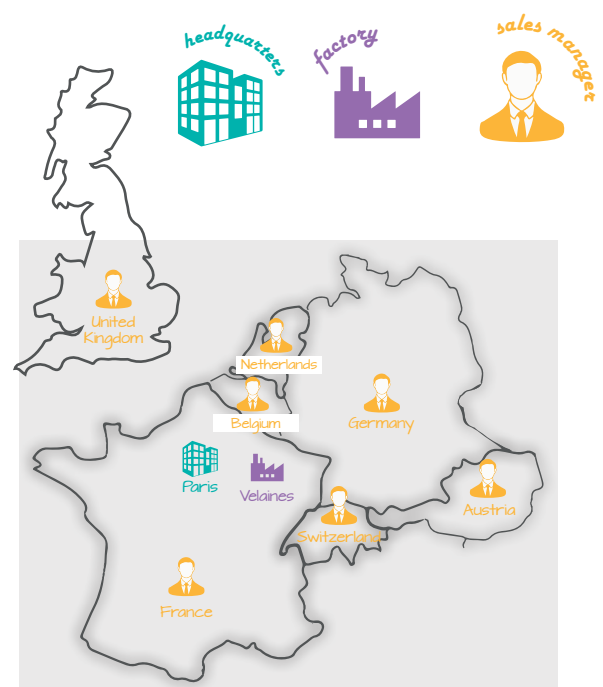

SARAYA, developper and manufactu-
rer of high performance hygiene pro-
ducts for over 65 years, has achieved its
desire to internationalize by acquiring
a French manufacturer of detergents.
Both sharing the same philosophy of
respect, they combined their expertise
to become **SARAYA Europe**, an inter-
national and innovative organization.

SARAYA Europe

A French Production Plant

A European team connected to subsidiaries around the world

SARAYA Europe

The efficient and responsible choice

SARAYA places quality and performance of its products at the heart of each formulation.

*From the chemical composition of the product to its packaging, we are committed to **respecting the environment** by producing **certified products and 100% recyclable packaging**. Concerned about the environment, we manufacture durable and effective products to preserve health, hygiene, and the well-being of our people.*

OFFICIAL CERTIFICATES USED BY SARAYA

ECOLOGY: Meets demanding criteria to reduce the environmental footprint.

PERFORMANCE: Each product is subjected to performance tests.

STRONG COMMITMENT: The European Ecolabel guarantees a high level of exigence in terms of reducing the impacts of products and services on the environment and health, without compromising on the level of performance..

RAW MATERIALS: of natural origins
RESPECT FOR THE ENVIRONMENT: in the manufacturing process.

TRANSPARENCY: display of the compositions in each product

CORPORATE SOCIAL RESPONSIBILITY

Every company should satisfy its customers while being socially and ecologically responsible. As a longtime provider of natural and eco-friendly products, **SARAYA** understands the importance of preserving nature's balance.

We strive to set positive conservation initiatives and environmental management efforts by creating partnership with NPOs.

We are committed to develop environmentally friendly products.

SUSTAINABLE DEVELOPMENT GOALS

17 GOALS TO TRANSFORM OUR WORLD

In 2015, the United Nations endorsed and adopted **17 sustainable development goals** that aim to end poverty, preserve the environment and address inequities. The Sustainable Development Goals are elements **shared by society for a community and a sustainable global environment**. **SARAYA** contributes to the achievement of these objectives in all the countries where we are present.

SUSTAINABLE PRODUCTS

SARAYA joins the Roundtable on Sustainable Palm Oil (RSPO) to ensure the development and use of sourced and sustainable palm oil in compliance with environmental standards.

RSPO-1106041

PROTECTION OF BIODIVERSITY

SARAYA is one of the co-founders of the Borneo Conservation Trust, an NGO recognized by the Malaysian authorities with the objective of acquiring batches of land along the Kinabatangan River to protect biodiversity. Thanks to these acquisitions, a continuous space is created. This allows species which were severely affected by deforestation, to be able to find a favorable biotope for survival.

A SOCIAL COMMITMENT

In partnership with UNICEF Japan, **SARAYA** is implementing the «Wash a Million Hands» project in Uganda to train hospital staff and locals good hygiene practices.

SOAPS

REAL NATURAL SOAP TO GUARANTEE MOISTURIZED AND HEALTHY HANDS

The SARASOFT range offers a wide choice of hand soaps that can be used daily. Depending on your preferences, you can choose from liquid or foam soaps, with or without perfume.

LIQUID AND FOAM SOAPS

ALSOFT - Natural foam soap

- **Made from coconut oil**
 - **Powerful degreasing power**
 - **Contains emollients to keep the skin's natural elasticity**
 - High quality soap
 - Rinses faster than synthetic detergents
 - Different formats of refills to meet hygiene standards
- Slightly alkaline* *Green Color*

Volumes - Ref : ☐ No Fragrance

Cartridge 450ml004964

Cartridge 1,2L005082

RANGE OF CERTIFIED SOAPS

COSMOS NATURAL certified by ECOCERT Greenlife according COSMOS available on: <https://COSMOS.ecocert.com>

ALSOFT - Vegetable foam soap obtained by saponification with natural ingredients

- **99% of natural origin certified COSMOS Natural**
 - **Powerful degreasing power**
 - **Optimal hydration enriched with vegetable glycerin**
 - High quality foam soap
 - Rinses faster than synthetic detergents
 - Different formats of refills to meet hygiene standards
- Slightly alkaline* *No Color*

Volumes - Ref : ☐ No Fragrance ☒ White Orchid

Cartridge 450ml004907 005098

DISINFECTANTS

A RANGE OF HAND AND SURFACES DISINFECTANT,
HIGH PERFORMANCE WITH BROAD VIRUCIDALE SPECTRUM

The ALSOFT VB and ALPET D2 ranges allow you to control the risks of cross contamination while guaranteeing an irreproachable and unequalled level of hygiene.

ALSOFT VB - Hydroalcoholic solution combining high performance and optimal hydration of the hands

- **Broad spectrum of activity:** 2 types of alcohol combined with phosphoric acid for excellent bactericidal, levuricidal and virucidal efficacy.
- Rapid antimicrobial action:
 - **Surgical disinfection in 60 seconds**
 - **Hygienic disinfection in 15 seconds**
- **Complete virucidal activity: 100% of virucidal action EN 14476 in 30 seconds**
- **Optimal hydration :** contains moisturizing agents providing softness and care after each use
- Liquid form that perfectly covers the entire hand and dries quickly
- Contains no gelling agent that prevents sticky hand sensations and allows the skin to breathe
- No color or perfume

Active Ingredients: Ethanol (CAS n°64-17-5): 66,5g/100g
Propan-1-ol (CAS n°71-23-8): 10g/100g

CONTINUOUS MOISTURIZING EFFECT

-Image. Change in the rate of hydration of the skin.

Chart. Photographs obtained with a microscope before and after application

During the uses of Alsoft VB, the hydration of the skin increases in contrast to the use of propan-2-ol 60% and ethanol solutions.

The use of solutions of typical solutions propan-2-ol 60% and Ethanol significantly alter the skin compared to Alsoft VB.

DISINFECTANT SURFACES FOR IMPECCABLE HYGIENE

ALPET D2 - Rapid high performance surface disinfectant

- **High antibacterial efficacy:** surface disinfectant composed of propane-2-ol 58.6% (m / m) as an active ingredient and a mixture of ammonium chloride.
- Rapid evaporation: protects water-sensitive equipment.
- Ideal non-corrosive formulation for furniture and other non-porous hard surfaces (TP02 TP04), compatible with external structures of equipment, including hard surfaces of non-submergible and non-invasive low-risk medical devices (Class I).
- Compatible with food contact after rinsing.

Active Ingredients : Propane-2-ol 58.6% (w/w), Decyldimethyloctylammonium chloride 0.0075% (w / w), Didecyldimethylammonium chloride 0.0045% (w/w), Dimethyldioctylammonium chloride 0.0030% (m/m).

DISPENSER

MANUAL AND AUTOMATIC DISPENSERS

Our dispensers are designed by our research & development and design teams to meet your high level of quality requirements.

UD-450

450ml

- No-Touch technology to reduce the risk of cross-contamination.
- Infrared sensor.
- Transparent window for viewing the level of the remaining product.
- Security lock by key.

Dimensions: W105 mm x W88 mm x H224 mm

Power source: 4 batteries LR14

Volume: 450ml Weight: 530g

Soap

Disinfectant

Ref: 73715

UD-1600

1.2L

- No-Touch technology: Eliminates all risks of cross-contamination.
- Good sensor sensitivity and fast dispensing.
- Quick and easy cartridge replacement.
- Adjustable dispensed volume (0.8 to 1.5ml).

Dimensions: W154 mm x W100 mm x H285 mm

Power source: 4 batteries LR14

Volume: 1.2L

Soap

Disinfectant

Ref: 56211

GUD-1000

1L

- No-Touch technology: Eliminates all risks of cross-contamination.
- 2 infrared sensors: high precision of the dispensed volume.
- Dispensing volume adjustable.
- 1 or 2 dose setting.
- Adjustable: wall and flat surface.

Dimensions : L147 mm x P101 mm x H268 mm

Power source: 4 piles LR20

Volume : 1L

Disinfectant

Ref: 77099

ADS-500/1000

500ml

1L

- A hygienic dispenser to fight against nosocomial diseases.
- An easily interchangeable pump for disinfectant or soap use. The cavity of the device allows the use of 500ml or 1L bottles.
- Using batteries, meaning no chords, allow you to place the dispenser wherever you want, for example, on a wall or countertop.

Dimensions: W104 mm x W190 mm x H312 mm

Power source: 4 batteries LR20

Volume: 500ml ; 1L

Disinfectant

Ref: 73820

ELEFOAM 2.0 - Foam soap automatic dispenser

250ml

- No-Touch technology: Eliminates all risks of cross-contamination.
- LED indicator light.
- Designed for easy use.
- An economic and environmentally friendly filling system.

Dimensions : W72 mm x W218 mm x H134 mm

Power source: 4 batteries AA

Volume: 250ml

L-type anti-drop wall support (It allows the dispenser to be hung on a wall or placed so that the nozzle is above the sink).

Soap

Ref: 73721

IS-9000 - Adjustable height support

- Height adjustable from 1.310 to 1.700mm adapted to the size of the users (young child to an adult).

Dimensions: W350 mm x W350 mm x H1310 ~1700 mm

Weight: 5.7 kg (without packaging).

HEALTH SYSTEM SARAYA

Synergizing elements for optimum efficiency

« Hands irritated by poor quality products are twice as likely to harbor bacteria »

Real soap

- Obtained by saponification
- Degreasing efficiency
- Gentle on the skin
- Optimal hydration

Liquid Disinfectant

- High performance
- Broad spectrum of action
- Hand hydration
- Rapid drying

Automatic Dispenser

- Large sprayer (covers the entire hand)
- Automatic diffusion: avoids cross contamination
- Increases the number of use per day (+61%)

DETERGENTS

OUR PROFESSIONAL RANGE OF ECO-LABELED DETERGENTS

Our R & D team works daily on the formulation of high-performance, quality and ecological detergents. All of our detergents have a limited impact on the aquatic environment, a reduced content of dangerous substances and assures you a tested and proven effectiveness.

ACTAE VERDE PROFESSIONAL RANGE

The values of SARAYA are to work on the efficiency of its products while respecting the environment.

The Actae Verde Professional range is a complete line of Ecolabel certified professional products that offers an excellent level of performance in industrial and institutional application areas, while integrating environmental aspects and user safety. The aim of this range is to offer professionals an alternative that is more respectful of the environment.

All formulations contain only allergen-free fragrances and do not contain EDTA, NTA, isothiazolinones, phosphonates or other substances deemed harmful to nature and human health.

All our products are regularly tested in laboratories to ensure their composition and effectiveness.

Actae Verde Professional products (formulas and packaging) are fully compliant with the European Ecolabel standard.

Ref: 56164

PGH-400 - Paper towel dispenser

- Compatible with different sizes of paper towels (Width: 210-230mm, Height: 70-85mm)
- View window of available paper stock
- Dispensing system of one paper towel at a time.
- Security lock with key.

Compatible with: Paper filling up to 240mm in height
Dimensions: W280mm x W110mm x H284mm
Weight: About 720g

Ref: 73807

DB-3500 Dustbin

- Large capacity of 35L.
- Lid with hole to prevent overflowing which ensures a good level of hygiene.
- Internal hanging system for a good hold of the trash bag.
- 2 installation modes: floor or wall hang.

Volume: 35L Weight: 2kg Dimensions: W377mm x W287mm x H542mm

Ref: 73965

AL-100 - Automatic air freshener diffuser

- Diffusion by ventilating gel ambient perfume.
- Silent device.
- Indicator light to indicate the duration of the battery life.
- 30 days of diffusion.

Power source: 1x alkaline battery D Weight: Environ 340g

Dimensions: W97mm x W87mm x H214mm

Ref: 73806

PEDAGOGY

EDUCATIONAL TOOLS

In order to support our partners and their customers, Saraya strives to provide the best educational tools possible to raise awareness about hygiene and their good practices (hygiene, disinfection and detergence).

SARAYA has been a member of POPS since the founding of the group in 2012.

POPS is a collaboration between committed industry and WHO to identify ways to improve patient safety to reduce infections associated with health care practices around the world.

80% OF MICROBES ARE TRANSMITTED BY HANDS

In hospitals 60 to 80% of HAI* are transmitted by hand

HAI*: Infections which are acquired in the hospital or health care setting.

Hand hygiene is a fundamental and effective approach to prevent infections.

DEFINITION OF HYGIENE OF HANDS BY THE WHO:

A generic term for any action to reduce or inhibit the presence and growth of microbial flora on the hands, usually by washing hands with soap and water and by rubbing hands with a hydro-alcoholic product.

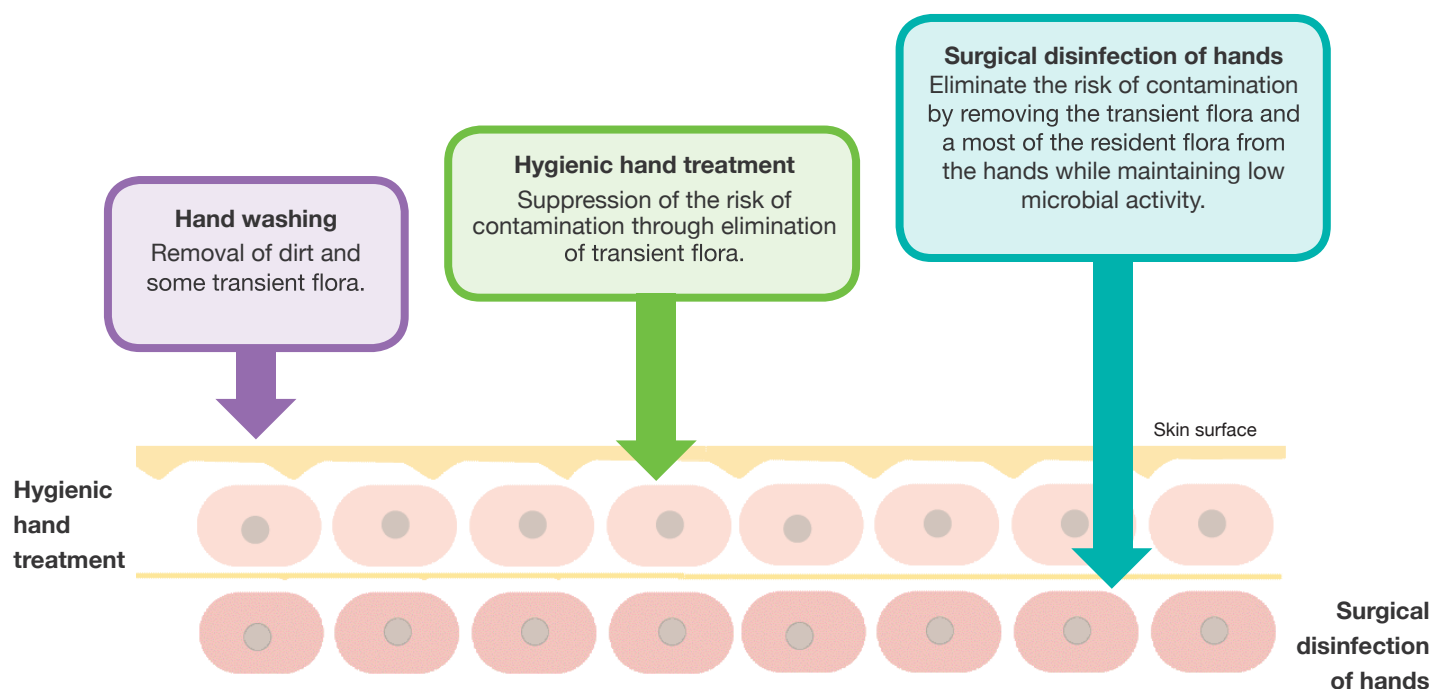

Rinsing hands only with water is not enough it is necessary to use a soap + disinfectant.

HAND HYGIENE IS DONE AT SEVERAL LEVELS OF ANTISEPSY:

- The three levels are:
- HAND WASHING
 - HYGIENIC TREATMENT OF HANDS
 - SURGICAL DISINFECTION OF HANDS

Each level of hygiene corresponds to a layer of skin and a type of bacterial flora, as described in the diagram below.

DIFFERENT STAGES OF HAND HYGIENE

Test conducted in SARAYA laboratories, showing the effectiveness of washing and disinfecting hands:

- 1 - Handprint of an unwashed hand
- 2 - No reduction in the number of microorganisms
- 3 - Reduced quantity in micro-organisms thanks to the soap detergent action
- 4 - Complete elimination of microorganisms by the SARAYA hydroalcoholic solution

DISINFECTION:

On the market there are 3 forms of hand disinfectants:

FOAM DISINFECTANT

- The formulation requires adding silicone *.
- Repeated use leaves sticky hands.

GEL DISINFECTANT

- The formulation requires adding thickeners *.
- The pump tends to get clogged.
- Longer drying time.

LIQUID DISINFECTANT

- Liquid texture **doesn't require adding** controversial ingredients.
- **Easy to spread** and covers the entire surface of the hands.
- **Shorter** drying time.

SUSTAINABLE DEVELOPMENT **

*Adding silicone to obtain a foaming form only concerns disinfectants.

**Sustainable development program incorporating 17 goals adopted by world leaders at the UN summit in 2015

UNEQUALLY DISTRIBUTED DISINFECTION ZONES

Effective disinfection depends on the right application, the right method of disinfection and the right distributor.

EDUCATIONAL TOOLS

The quality of a hand hygiene product is not enough. It is indeed essential to make sure that the user is aware of hygiene practice.

At SARAYA, we strive to provide our customers the best advices on medical, food and public hygiene through publications and learning tools to ensure a better hygiene. Education is an important part of the fight against infections, which is why we are working to help our customers to get the best out of our products.

GOOD HAND HYGIENE PRACTICE

In addition to publishing brochures about infection control, we provide tools to help our customers on how to practice good hand hygiene.

These learning tools are intended to help the user to better prevent the infections.

HAND SOAP

Wet hands with water

Apply enough soap to cover all hand surfaces

Rub from palm to palm

Right palm over left dorsum with fingers intertwined and vice versa

Palm to palm with fingers intertwined

Rub the backs of the fingers by holding them in the palms of the hands, and oppose a back and forth motion

Clean the left thumb with rotating movements of the right hand and vice versa

Clean the fingertips with the palm of your hand as shown in the picture

Rinse hands with water

Dry hands thoroughly with a single use towel

Use towel to turn off faucet

HAND DISINFECTANT

Apply the proper amount of hand sanitizer on the tips of your fingers and the palm of your hands.

Se frotter les mains paume contre paume

Right palm over left dorsum with fingers intertwined and vice versa

Palm to palm with fingers intertwined

Rub the backs of the fingers by holding them in the palms of the hands, and oppose a back and forth motion

Rotate the left thumb in the right palm and vice versa

Clean the fingertips with the palm of your hand as shown in the picture

WHY AN AUTOMATIC DISPENSER?

	MANUAL DISPENSER	AUTOMATIC DISPENSER
+	Less expensive than an automatic	Without contact, we avoid a vector of possible contamination
-	Becomes fragile during handling Risk of contamination	More expensive than a manual Battery management

Studies show that the frequency of using an automatic dispenser is higher than a manual.

	MANUAL DISPENSER	AUTOMATIC DISPENSER	USAGE ADVANTAGES
Significant number of use per dispenser per day	25,6	41,2	+61%
Significant number of handwashing per patient per hour	3,33	4,42	+33%

Sensor dispensers help to comply with hygiene rules and thus guarantee better hygiene.

ADJUSTABLE HEIGHT
The height can be adjusted from 1.31 and 1.7m to easily adapt to children and adults.

EDUCATIONAL AND PROMOTIONAL INSERT

IS-9000
L350 x P350 x H1310 ~1700 mm

Adjustable support

Advertising insert (220 x 150mm)

You can display advertising inserts or disinfecting hands information .

The insert is not provided but you can easily create your own. Do not hesitate to ask us for our possible designs.

IS-9000M
L350 x P350 x H1310 ~1700 mm

Adjustable support

The screen can display movies or pictures continuously or by activating the sensor. The demo screen offers a video on the protocol of hand disinfection. Ideal for promoting advertisement slots or information on hand hygiene in public places.

DETERGENTS

A detergent is a chemical compound, with surfactant properties, capable of detaching impurities adhering to a support (textile, dishes, surface, skin ...).

Detergents can be differentiated according to their pH (acidic or alkaline).

To choose a detergent, take into account the type of dirt present on the support.

INORGANIC

Tarter, rust, limestone, cement, plaster ...

Acid detergents

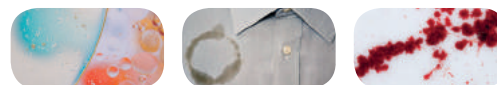

pH 0-5
Descaler
Scrub

Neutral detergents

pH 5-7
Multi-purpose

ORGANIC

Oil, fat, blood, urine ...

Alkaline detergents

pH 9-14
Degreaser
Remover

THE SINNER CERCLE

According to the Sinner Circle, to clean effectively, it is necessary to respect the balance between these 4 factors:

Water temperature

The heat increases the detergent capacity, it accelerates the cleaning process and reduces the need for mechanical action.

Chemical action

The choice of the cleaning product and the respect of the dosage directly impact the final result.

Mechanical action

The mechanical action can be carried out manually (broom wash, etc) or by means of suitable equipment (auto washer, etc).

Contact time

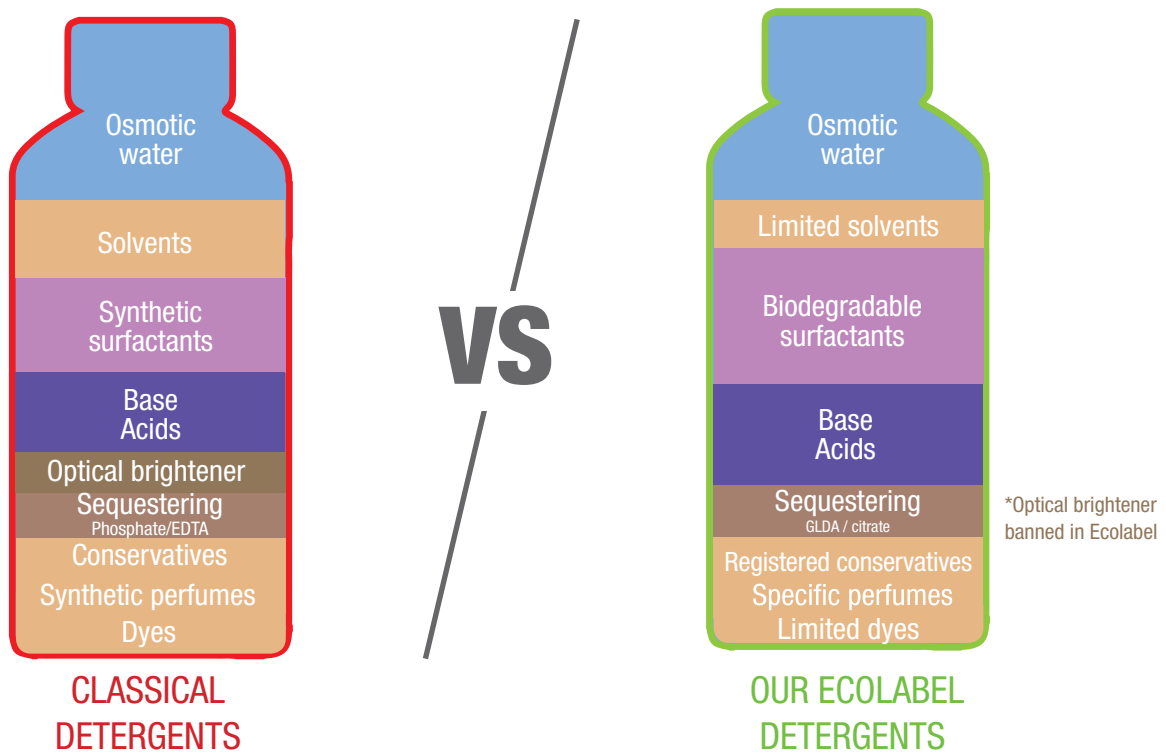

It is the action time of the product and the mechanical operation. The factor «action time» is very often neglected.

The balance of the 4 factors must be adapted to each situation for an optimum result.

SARAYA puts the quality and performance of its products at the heart of each formulation, thus ensuring users optimal efficiency.

WHY CHOOSE OUR ECO-LABELED RANGES?

- Many synthetic molecules
- Environmental and sometimes health impact

- Environmentally friendly and user friendly ingredients
- Efficiency at least equal to a market standard
